SUBJECT INDEX

AA 861
Inhibition of bovine lymphocyte response to phytohemagglutinin by a specific 5-lipoxygenase inhibitor 269
Antibodies
Applications of monoclonal antibodies (book review) 295
Attempts to localize the defect in dysgammaglobulinemia of UM-B19 chickens by studying the effect of immunomodulating substances on immunoglobulin and antibody production 123
Bovine viral diarrhea virus-infected MDBK monolayer as antigen in enzyme-linked immunosorbent assay (ELISA) for the measurement of antibodies in bovine sera 377
Detection of serum antibodies against *Ehrlichia risticii* in Potomac horse fever by enzyme-linked immunosorbent assay 85
Influence of the *Hal* locus and standardized stress on antibody response and in vitro reactivity of peripheral blood lymphocytes in pigs 157
Production and characterization of monoclonal antibodies specific for sheep IgG subclasses IgG_1 or IgG_2 187
Use of enzyme-linked immunosorbent assay to measure bovine milk and serum antibodies to alpha toxin, beta toxin, and capsular antigens of *Staphylococcus aureus* 145
Autoimmunity
Localization of immunoglobulins and complement by the peroxidase antiperoxidase method in autoimmune and non-autoimmune canine dermatopathies 1
Babesia bovis
Analysis and vaccination trial with the cryoprecipitable immune complex 57
Bacteria
Detection of serum antibodies against *Ehrlichia risticii* in Potomac horse fever by enzyme-linked immunosorbent assay 85
Immunotoxic effects of T-2 mycotoxin on cell-mediated resistance to *Listeria monocytogenes* infection 11
Neutrophil mediated and IgA dependent antibacterial immunity against enteropathogenic *Escherichia coli* in the porcine intestinal mucosa 23
Neutrophil phagocytic and serum opsonic response of the foal to *Corynebacterium equi* .. 279
Use of enzyme-linked immunosorbent assay to measure bovine milk and serum antibodies to alpha toxin, beta toxin, and capsular antigens of *Staphylococcus aureus* 145
Blastogenesis
Effect of serum on lymphocyte blastogenesis. 2. Characterization of disease-induced immunosuppressive factors by chromatography and molecular weight determination . 319
Bovine leukemia virus
Neutrophil function in sheep experimentally infected 67
Cattle
Babesia bovis - analysis and vaccination trial with the cryoprecipitable immune complex 57
Bovine IgM: does it fix guinea pig complement in the absence of bovine complement components? 335
Bovine viral diarrhea virus-infected MDBK monolayer as antigen in enzyme-linked immunosorbent assay (ELISA) for the measurement of antibodies in bovine sera 377
Cytotoxic capabilities of lymphocytes after lectin stimulation 297
Distribution of T and B lymphocytes in mammary dry secretions, colostrum and blood of adult dairy cattle 101
Effects of glucocorticosteroids on the chemiluminescence response of phagocytic cells 245

Establishment and initial characterization of continuous in vitro cultures of T lymphocytes 209
Inhibition of lymphocyte response to phytohemagglutinin by a specific 5-lipoxygenase inhibitor 269
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of polymorphonuclear leukocytes 233
Isolation of bovine complement factor H 357
Natural cell-mediated cytotoxicity to cells infected with infectious bovine rhinotracheitis virus 45
Separation and identification of lymphocyte populations 77
Use of enzyme-linked immunosorbent assay to measure milk and serum antibodies to alpha toxin, beta toxin, and capsular antigens of *Staphylococcus aureus* 145

Chemiluminescence
Effects of glucocorticosteroids on the chemiluminescence response of bovine phagocytic cells 245
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of bovine polymorphonuclear leukocytes .. 233

Chicken
Attempts to localize the defect in dysgammaglobulinemia of UM-B19 chickens by studying the effect of immunomodulating substances on immunoglobulin and antibody production 123
Development of optimal conditions for lymphokine production by chicken lymphocytes . 257

Complement
Bovine IgM: does it fix guinea pig complement in the absence of bovine complement components? 335
Isolation of bovine complement factor H 357
Localization of immunoglobulins and complement by the peroxidase antiperoxidase method in autoimmune and non-autoimmune canine dermatopathies 1

Concanavalin A
Cytotoxic capabilities of bovine lymphocytes after lectin stimulation 297

Corticosteroids
The effects of glucocorticosteroids on the chemiluminescence response of bovine phagocytic cells 245

Corynebacterium equi
Neutrophil phagocytic and serum opsonic response of the foal to *C. equi* 279

Cryoprecipitable immune complex
Babesia bovis – analysis and vaccination trial with the cryoprecipitable immune complex 57

Cytotoxicity
Cytotoxic capabilities of bovine lymphocytes after lectin stimulation 297
Natural cell-mediated cytotoxicity to cells infected with infectious bovine rhinotracheitis virus 45
Porcine effector mechanisms: antibody-dependent cell-mediated cytotoxicity of pseudorabies-infected target cells 223

Diagnosis
Evaluation of a solid-phase immunoassay (DIG-ELISA) for the serodiagnosis of ovine toxoplasmosis 309

Diarrhea
Bovine viral diarrhea virus-infected MDBK monolayer as antigen in enzyme-linked immunosorbent assay (ELISA) for the measurement of antibodies in bovine sera 377

Dog
Effect of serum on lymphocyte blastogenesis. 2. Characterization of disease-induced immunosuppressive factors by chromatography and molecular weight determination . 319

Localization of immunoglobulins and complement by the peroxidase antiperoxidase method in autoimmune and non-autoimmune canine dermatopathies 1
Dysgammaglobulinemia
Attempts to localize the defect in dysgammaglobulinemia of UM-B19 chickens by studying the effect of immunomodulating substances on immunoglobulin and antibody production 123
Ehrlichia risticii
Detection of serum antibodies against *E. risticii* in Potomac horse fever by enzyme-linked immunosorbent assay 85
Escherichia coli
Neutrophil mediated and IgA dependent antibacterial immunity against enteropathogenic *E. coli* in the porcine intestinal mucosa 23
Eye disease
Tears and aqueous humor from horses inoculated with *Leptospira* contain antibodies which bind to cornea 181
Genetics
Influence of the *Hal* locus and standardized stress on antibody response and in vitro reactivity of peripheral blood lymphocytes in pigs 157
Guinea pig
Bovine IgM: does it fix guinea pig complement in the absence of bovine complement components? 335
Histamine
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of bovine polymorphonuclear leukocytes .. 233
Horse
Detection of serum antibodies against *Ehrlichia risticii* in Potomac horse fever by enzyme-linked immunosorbent assay 85
Neutrophil phagocytic and serum opsonic response of the foal to *Corynebacterium equi* .. 279
Quantification of immunoglobulins in respiratory tract secretions of the horse 197
Tears and aqueous humor from horses inoculated with *Leptospira* contain antibodies which bind to cornea 181
Immunoglobulins
Attempts to localize the defect in dysgammaglobulinemia of UM-B19 chickens by studying the effect of immunomodulating substances on immunoglobulin and antibody production 123
Bovine IgM: does it fix guinea pig complement in the absence of bovine complement components? 335
Bovine viral diarrhea virus-infected MDBK monolayer as antigen in enzyme-linked immunosorbent assay (ELISA) for the measurement of antibodies in bovine sera 377
Localization of immunoglobulins and complement by the peroxidase antiperoxidase method in autoimmune and non-autoimmune canine dermatopathies 1
Neutrophil mediated and IgA dependent antibacterial immunity against enteropathogenic *Escherichia coli* in the porcine intestinal mucosa 23
Production and characterization of monoclonal antibodies specific for sheep IgG subclasses IgG_1 or IgG_2 187
Quantification of immunoglobulins in respiratory tract secretions of the horse 197
Immunology, general
Introduction to medical immunology (book review) 385
Veterinary immunology (book review) 93

Immunomodulation
Attempts to localize the defect in dysgammaglobulinemia of UM-B19 chickens by studying the effect of immunomodulating substances on immunoglobulin and antibody production 123
Immunosuppression
Effect of serum on lymphocyte blastogenesis. 2. Characterization of disease-induced immunosuppressive factors by chromatography and molecular weight determination . 319
Indomethacin
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of bovine polymorphonuclear leukocytes .. 233
Infectious bovine rhinotracheitis virus
Natural cell-mediated cytotoxicity to cells infected with infectious bovine rhinotracheitis virus 45
Intestinal tract
Neutrophil mediated and IgA dependent antibacterial immunity against enteropathogenic *Escherichia coli* in the porcine intestinal mucosa 23
Leptospira interrogans
Tears and aqueous humor from horses inoculated with *Leptospira* contain antibodies which bind to cornea 181
Leucocytes
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of bovine polymorphonuclear leukocytes .. 233
Listeria monocytogenes
Immunotoxic effects of T-2 mycotoxin on cell-mediated resistance to *L. monocytogenes* infection 11
Lymphocytes
Cytotoxic capabilities of bovine lymphocytes after lectin stimulation 297
Development of optimal conditions for lymphokine production by chicken lymphocytes . 257
Distribution of T and B lymphocytes in mammary dry secretions, colostrum and blood of adult dairy cattle 101
Effect of serum on lymphocyte blastogenesis. 2. Characterization of disease-induced immunosuppressive factors by chromatography and molecular weight determination . 319
Establishment and initial characterization of continuous in vitro cultures of bovine T lymphocytes 209
Influence of the *Hal* locus and standardized stress on antibody response and in vitro reactivity of peripheral blood lymphocytes in pigs 157
Inhibition of bovine lymphocyte response to phytohemagglutinin by a specific 5-lipoxygenase inhibitor 269
Separation and identification of bovine lymphocyte populations 77
Staining of pig lymphocytes subpopulations with acid α-naphthyl acetate esterase 173
Lymphokines
Development of optimal conditions for lymphokine production by chicken lymphocytes . 257
Macrophages
Macrophage activation (book review) 205
Mammary gland
Distribution of T and B lymphocytes in mammary dry secretions, colostrum and blood of adult dairy cattle 101
Milk
Use of enzyme-linked immunosorbent assay to measure bovine milk and serum antibodies to alpha toxin, beta toxin, and capsular antigens of *Staphylococcus aureus* 145
Mitogens
Influence of the *Hal* locus and standardized stress on antibody response and in vitro reactivity of peripheral blood lymphocytes in pigs 157

Monoclonal antibodies
Applications of monoclonal antibodies (book review) 295
Production and characterization of monoclonal antibodies specific for sheep IgG subclasses IgG_1 or IgG_2 187
Mouse
Immunotoxic effects of T-2 mycotoxin on cell-mediated resistance to *Listeria monocytogenes* infection 11
Natural killer (NK) cells
Isolation and characterization of porcine natural killer (NK) cells 345
Neutrophils
Neutrophil function in sheep experimentally infected with bovine leukemia virus 67
Neutrophil mediated and IgA dependent antibacterial immunity against enteropathogenic *Escherichia coli* in the porcine intestinal mucosa 23
Neutrophil phagocytic and serum opsonic response of the foal to *Corynebacterium equi* .. 279
Opsonic activity
Neutrophil phagocytic and serum opsonic response of the foal to *Corynebacterium equi* .. 279
Phagocytosis
Effects of glucocorticosteroids on the chemiluminescence response of bovine phagocytic cells 245
Neutrophil phagocytic and serum opsonic response of the foal to *Corynebacterium equi* .. 279
Phytohaemagglutinin
Cytotoxic capabilities of bovine lymphocytes after lectin stimulation 297
Inhibition of bovine lymphocyte response to phytohemagglutinin by a specific 5-lipoxygenase inhibitor 269
Pig
Influence of the *Hal* locus and standardized stress on antibody response and in vitro reactivity of peripheral blood lymphocytes 157
Isolation and characterization of natural killer (NK) cells 345
Neutrophil mediated and IgA dependent antibacterial immunity against enteropathogenic *Escherichia coli* in the intestinal mucosa 23
Porcine effector mechanisms: antibody-dependent cell-mediated cytotoxicity of pseudorabies-infected target cells 223
Staining of lymphocytes subpopulations with acid α-naphthyl acetate esterase 173
Potomac horse fever
Detection of serum antibodies against *Ehrlichia risticii* by enzyme-linked immunosorbent assay 85
Prostaglandins
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of bovine polymorphonuclear leukocytes .. 233
Protozoa
Babesia bovis - analysis and vaccination trial with the cryoprecipitable immune complex 57
Evaluation of a solid-phase immunoassay (DIG-ELISA) for the serodiagnosis of ovine toxoplasmosis 309
Pseudorabies
Porcine effector mechanisms: antibody-dependent cell-mediated cytotoxicity of pseudorabies-infected target cells 223
Respiratory tract
Quantification of immunoglobulins in respiratory tract secretions of the horse 197

Sheep
Evaluation of a solid-phase immunoassay (DIG-ELISA) for the serodiagnosis of ovine toxoplasmosis 309
Neutrophil function in sheep experimentally infected with bovine leukemia virus 67
Production and characterization of monoclonal antibodies specific for sheep IgG subclasses IgG_1 or IgG_2 187
Skin disease
Localization of immunoglobulins and complement by the peroxidase antiperoxidase method in autoimmune and non-autoimmune canine dermatopathies 1
Staphylococcus aureus
Use of enzyme-linked immunosorbent assay to measure bovine milk and serum antibodies to alpha toxin, beta toxin, and capsular antigens of *S. aureus* 145
Stress
Influence of the *Hal* locus and standardized stress on antibody response and in vitro reactivity of peripheral blood lymphocytes in pigs 157
Techniques
Bovine viral diarrhea virus-infected MDBK monolayer as antigen in enzyme-linked immunosorbent assay (ELISA) for the measurement of antibodies in bovine sera 377
Detection of serum antibodies against *Ehrlichia risticii* in Potomac horse fever by enzyme-linked immunosorbent assay 85
Effect of serum on lymphocyte blastogenesis. 2. Characterization of disease-induced immunosuppressive factors by chromatography and molecular weight determination . 319
Establishment and initial characterization of continuous in vitro cultures of bovine T lymphocytes 209
Localization of immunoglobulins and complement by the peroxidase antiperoxidase method in autoimmune and non-autoimmune canine dermatopathies 1
Separation and identification of bovine lymphocyte populations 77
Staining of pig lymphocytes subpopulations with acid α-naphthyl acetate esterase 173
Toxins
Immunotoxic effects of T-2 mycotoxin on cell-mediated resistance to *Listeria monocytogenes* infection 11
Use of enzyme-linked immunosorbent assay to measure bovine milk and serum antibodies to alpha toxin, beta toxin, and capsular antigens of *Staphylococcus aureus* 145
Toxoplasma gondii
Evaluation of a solid-phase immunoassay (DIG-ELISA) for the serodiagnosis of ovine toxoplasmosis 309
Tuftsin
In vitro effects of prostaglandin E_1, prostaglandin E_2, indomethacin, histamine, and tuftsin on the chemiluminescence response of bovine polymorphonuclear leukocytes .. 233
Vaccination
Babesia bovis – analysis and vaccination trial with the cryoprecipitable immune complex 57
Viruses
Bovine viral diarrhea virus-infected MDBK monolayer as antigen in enzyme-linked immunosorbent assay (ELISA) for the measurement of antibodies in bovine sera 377
Natural cell-mediated cytotoxicity to cells infected with infectious bovine rhinotracheitis virus 45
Neutrophil function in sheep experimentally infected with bovine leukemia virus 67
Porcine effector mechanisms: antibody-dependent cell-mediated cytotoxicity of pseudorabies-infected target cells 223
